

Department of Mechanical Engineering

Srinivasa Institute of Engineering & Technology, Cheyyuru –533216

The Mechanical Engineering Department recently hosted a vibrant **Tech Fest** and **Engineering Day**, bringing together innovation, creativity, and celebration. The Tech Fest showcased students' technical prowess through model-making competitions, CAD design challenges, and hands-on workshops on emerging technologies like 3D printing and renewable energy systems. Exhibitions of innovative projects and guest lectures by industry experts highlighted advancements in automation, robotics, and sustainability.

Engineering Day added a festive touch, with technical paper presentations, skill development sessions, and fun activities like bridge-building contests and robo races. The events concluded with cultural performances and awards, recognizing outstanding contributions, fostering teamwork, and inspiring students to push the boundaries of engineering excellence.

The Tech Fest featured engaging workshops on advanced topics like CNC programming, thermal analysis, and AI in manufacturing, along with competitions such as quiz contests, design challenges, and technical treasure hunts. Students also showcased their creative skills through project exhibitions, presenting innovative solutions in areas like energy conservation and automation.

Engineering Day complemented the fest with paper presentations, guest lectures, and skill-building sessions focused on industry trends and career development. Exciting activities like robo races, prototype modeling, and bridge-building contests highlighted the practical application of engineering principles. The events were capped with award ceremonies and cultural performances, fostering a sense of pride and unity among participants while encouraging future innovation and collaboration.
